FALSE LABOR

First contractions  
first snowy  
night I packed my  
suitcase, started car

the baby dropped into  
place, in my mind  
a halo over his or her  
face, I thought of people

I'd call or write to  
with the news, no baby  
yet in crib I leaned over, still  
to stare into tightly shut eyes

of unseen sleepy baby, not yet

ORGASM XXXIV

"...each in his own time to

define

Time, Place & Circumstance "

to reveal what's to be reveal'd. First Card: man w/right hand pointing  
above the left below. There is no avoiding this verity.

The Roses Red & Lilies White

there (slowly) for the eyes delight.

Activity & Purity (innocence) Implements for yr Great Work

before him upon the Table of elements: Earth, Air .

Fire & Water are everywhere indicated. About his waist,

symbolized by the uroboros, the ancient Truth about yr

Greater & Lesser states of matter. Above his

head: Sign for "what's it always about always

& never for one moment ceasing." Kung,

that would be & Heraclitus not yet seen light of day

in Greece. As from the Wheel of Fortune

in endless reiterations, there is no new knowledge. What is known

has been known for a very long time. It is to yr rediscovery

of what is ancient & very respected.

as from the Wheel of Fortune

in endless reiterations etc. for knowledge on another level

is knowing that you do not know & having the gall dern gall to say so

i.e., that you do not know.

for I have come to sing the praise

of two Sages: Rapallo & of Lu & if you do not come by that wisdom

my friend you simply do not come.

when you see worth

(Right --Greatness) don't try to squirm past ante up and set about to

make it available to the people,

but when I say: "I don't know" it may be for two

diametrically opposing reasons. don't pick at it, dar dar dit

dada & it comes up zippidy-zapp everyday

illuminating ev'ry hollow. Splendid!

for I say unto you:

renew thy self, gall-dammit

day by day

make it new!

(and as re "finer states of matter"

what's finer than "mind" containing it

or 'em?)'

(as to wisdom; a skull (dry) full of sand.

yes, you can pour.

are there "lost motets" of Bach?

or the view of Avco, Durer

(Albrecht) unmistakably emerging from the landscape:

our Alchemist. those rocks' upthrust

the Stone before him at his feet, as tho' disdainful

to claim it. but not to those anxious to power, but to the

higher attainment (yes, Virtue) to encompass "the greater  
 & lesser Cosmos". then and only then will electro\*bio-chemical  
 of the mind's make up come to correct solution  
 proper to "condensation" & "distillation".  
 in a View of Avco he sits, against those rocks  
 as surveying all the he has created  
 Our Stone on the ground before him as tho'  
 disdaining the fruit of his labor.  
 few attain to it & few who do just as soon not discuss. but it is  
 ev'rywhere the many trample it underfoot in their rush  
 to gather "fools' gold". why should a man want fifty million dollars?  
 Power & more power the wealth of the nation concentrated  
 in fewer & fewer hands til the government diverted from  
 "the people". what a man needs is to go into the Mine and there  
 dig until by much labour & many failures he attains it.  
 Our Stone. governments of the world have a great work to  
 accomplish: diminish themselves till ev'ry man his own  
 governor, and the face of planet over which, unobstructed  
 the sages may walk  
 or is the Fabric holding together all this  
 vast insubstantial shew, we come to the Last Card: The World  
 as Guri (Russian astronaut) saw her climbing the azure  
 vault; a sheath of green & blue abt her midriff. a dancer  
 performing among the other celestial dancers. as to  
 matter in this:

of Time. ....
